ADD-ON'S

About Inven EMR

Invent EMR is a comprehensive Electronic Medical Records system designed and programmed for doctors themselves. The solution is customizable and works for any medical speciality. The idea is simply enabling medical firms owners to focus on what they do best "Treatment" while the EMR application handles all business operations right from patient and treatment management down to all accounting aspects. The solution comes in different flavors and dozens of extra "add-on's" and utilities, a diversity for any firm to choose only what they need.

The system is used by hundreds of users and in continuous advancement and progress by Invent ITS – a leading IT firm specialized in providing medical solutions. For more details visit: Invent.bh.
